# Installation Instruction for the Update V7.0T

Due to the automatic Update your BERNINA Embroidery software DesignerPlus 7 or EditorPlus 7 will be updated from the version J, M, Q or R to the latest version T.

1   Installation of V7.0T on Windows PC basing on Internet connection

When you have installed the embroidery software on a PC with Windows 7/8/10, you will be asked by a pop-up window to download and to install the latest version T. Follow the instructions and restart the computer so that the installation can be completed.

Please note: The dongle driver is also updated so that the safety dongle will be compatible with Windows 10. This will take some time. Do not remove the safety dongle during the installation.

2   New installation of V7.0T on Windows PC basing on Internet connection

When you would like to install the software V7 on a PC with Windows 7/8/10 for the first time, then please install the full version R. When you are asked to plug in the dongle, Windows will install the latest dongle driver automatically. While starting the software you will be asked to install the update version T as above mentioned.

If you have a computer without a DVD device, you can download and install the full version R (ca. 1.9 GB) via the support page. Link to download: Full version R
While starting the software you will be asked to install the update version T as above mentioned.

3   Installation of V7.0T on Windows PC without Internet connection

Before you can install the update, you will have to acquire the latest Dongle-driver V7.41 (ca. 15 MB) and the Update V7.0T (ca. 200 MB) first. Save both files on a USB stick. Insert the USB stick into the PC and install the dongle driver first and then the update. The dongle driver ensures that the safety dongle will be recognized by Windows 10.

4   Access to version notes (ReleaseNotes.pdf)

Before the latest Release Notes can be displayed in the software via **Help > Release Notes**, they need to be downloaded from the homepage and copied to the folder C:\Program Files (x86)\BERNINA\Embroidery Software 7\BIN.
