QuiltCAD Basics

Basic Pattern Selection

To Open (READ) a pattern (design) file –

- Click on **Read** to view the **Patterns** dialogue box.
- To view thumbnails > click on the **View Menu** tab > from the drop down menu select **Thumbnails**.
- Open the **Block folder**
- Scroll down > select pattern > **Fill 3. gpf** > **Open**.

The selected pattern can be seen in the pattern viewing window in the pattern selection area so you always know what pattern (design) you are working with.

- Select a block > Click one time to select the block; you will see the color of the block change to indicate it is selected and active.
- Click on **Place** in the **Pattern Selection** area and the pattern will now appear on the selected block.

- Click **Zoom** to view the pattern
- Click **Zoom** to return to the **Quilt Area** view.
- Once the pattern is placed in the quilt area you are ready to start the automated quilting process.

TAKE – PLACE- STITCH.
