BERNINA overlockers –
Sew, cut and neaten in a single operation!

With a BERNINA overlocker, your sewing projects take shape unbelievably quickly and effortlessly. BERNINA overlockers sew, cut and neaten in a single operation – in overlock, chain or coverstitch. Innovative features make BERNINA overlockers delightfully easy to use, and ensure professional quality down to the last stitch.

Exclusive BERNINA overlocker features*

Perfect rolled hem
Perfect rolled hems made easy: Simply slide the lever to switch the machine from overlock stitching to rolled hemming and back, with no need to change the stitch plate or presser foot.

Swing-out presser foot
This patented feature provides better access to the needles, for easier threading and needle replacement.

Multi-purpose foot
With built-in pressure-release lever. This foot is suitable for all stitch types. Also features a built-in tape guide for holding narrow ribbons or elastic in place while overlocking.

Smooth, quiet operation
Top-quality construction and optimally matched components ensure the incredibly smooth, quiet running of BERNINA overlockers, letting you work comfortably and for longer periods.

Reliability and long working life
As with all BERNINA products, you can count on the highest quality. With BERNINA overlockers you’ve got a reliable, long-term partner for professional and creative sewing.

Handwheel position indicator
A real advantage for easy sewing: The viewing panel and red position indicators make it simple to find the ideal position for the needles and lower looper for threading. What’s more, the purple mark shows you the best position for switching from overlock to coverstitch mode.
## Further advantages*

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>24 stitch variations</strong></td>
<td>The BERNINA overlocker range offers 24 different stitch variations, including a chainstitch, four coverstitches, and four combination overlock and chain stitches.</td>
</tr>
<tr>
<td><strong>Stitch widths of up to 9 mm</strong></td>
<td>Even lets you sew together loose knits, such as hand-knitted jumpers.</td>
</tr>
<tr>
<td><strong>Front foot lift</strong></td>
<td>The tip of this presser foot can be lifted, making it much easier to position multiple layers of fabric and bulky projects beneath it.</td>
</tr>
<tr>
<td><strong>Direct threading (lay-in system)</strong></td>
<td>The lay-in system and the colour-coded threading paths let you thread the upper and lower loopers quickly and reliably.</td>
</tr>
<tr>
<td><strong>Auto-threader for two needles</strong></td>
<td>For easy threading of both overlocker needles.</td>
</tr>
<tr>
<td><strong>Personal reference setting</strong></td>
<td>Save your own personal settings for sewing with your preferred material for each stitch variation.</td>
</tr>
<tr>
<td><strong>LCD screen</strong></td>
<td>Lets you keep track of your personal reference settings and basic settings for the different stitch variations.</td>
</tr>
<tr>
<td><strong>Simultaneous thread-tension release</strong></td>
<td>Works on all four tensions when you raise the presser foot. This feature makes it easier to remove your project from underneath the presser foot. Threads can be pulled without causing a problem.</td>
</tr>
<tr>
<td><strong>Use of standard sewing-machine needles</strong></td>
<td>Standard needles can be used for all usual sewing projects.</td>
</tr>
<tr>
<td><strong>High-performance upper knife drive</strong></td>
<td>This drive ensures an extremely powerful cutting force. Even thick fabrics won’t deflect the upper knife, so all fabric edges can be trimmed safely and professionally. A technology used in industry.</td>
</tr>
<tr>
<td><strong>Swing-out upper-knife arm</strong></td>
<td>At the press of a button, the upper-knife arm can be released quickly and easily to provide more room. This is particularly useful when, for example, you’re working in coverstitch mode, or do not wish to trim the fabric edge.</td>
</tr>
</tbody>
</table>

*Some features are only available on specific models
A twist of the knob for the perfect overlock seam

The patented mtc micro thread control saves you significant time and effort while ensuring consistent high-quality stitches, since you need only set thread tension once – even if you alter the cutting width and fabric thickness! The seam is fine-tuned almost effortlessly via the special mtc knob.

**mtc** thread control lets you adjust the amount of loop with a simple twist of the mtc knob in a single operation – enabling you to avoid protruding thread loops and create professional looking seams and edge finishes.

In order for models without mtc technology to produce attractive seams, the cutting width and one of the two loop tensions must be altered; with easy-to-use mtc thread control, such multiple adjustments are unnecessary. Mtc technology includes the knife and stitch tongue when you adjust the mtc knob.

**After adjustment with mtc**, the seam matches perfectly and finishes neatly with the fabric edge.

**Before adjustment with mtc**, the seam is too loose and the loops lack an attractive finish.
The high-end machine

Professional-looking, versatile and creative sewing is now within your grasp, thanks to the BERNINA 1300MDC. This machine combines cutting-edge technology with a wide selection of stitches, a wide seam-width range of 3 to 9 mm, and various deluxe functions, chief among which is the patented BERNINA mtc technology.
**mtc Thread Control:**
For unparalleled ease in setting the over-edge thread length – at the twist of a knob.

**24 stitch variants:**
On offer are a chainstitch, four coverstitches and four combination stitches (chainstitch/overlock stitch).

**5-thread safety-seam stitch:**
The hard-wearing safety seam (combination stitch) is ideal for reliably joining firm woven fabrics, such as jeans.

**Coverstitch:**
The 3- and 4-thread coverstitch gives you an especially durable, flat stitch in highly elastic fabrics.

**Lay-in threading system:**
The BERNINA lay-in system allows quick, direct threading every time – and thanks to the automatic lower-looper threading system, threading the lower looper is also a breeze.

**Handwheel position indicator:**
Easy, ergonomic operation: With the aid of the vision panel and the red position indicators, you’ll find the ideal needle and lower-looper threading position in no time flat.

As an experienced overlocker, you’re sure to have come across this problem: you’re sewing thin fabric, and want to adjust the seam width. Until now, you would have had to reset the thread tension separately, in addition to adjusting the cutting width. Now, though, you can spare yourself this tedious task. The new BERNINA ‘M’ models feature innovative mtc technology, with the upshot that in future you’ll need only set thread tension ONCE – even if you alter the cutting width and fabric thickness! The seam is fine-tuned almost effortlessly via the special mtc knob. The result is flawless seams that can also be worn decoratively on the outside of the garment. To stimulate your creativity, there are also four coverstitch variants to choose from which are ideally suited to hemming tricot fabrics, sewing in elastic and stretch lace, and trimming edges and decorative hems. They are also perfect for embellishments, especially when used with decorative threads.

---

**The advantages of mtc (Micro Thread Control) at a glance**

- Flexible cutting widths of 3 – 9 mm for wide, decorative flatlocked seams in almost all fabrics
- Over-edge thread length need only be set once – the stitch tongue moves with the knife
- Easy, flexible fine-tuning of seam via special knob
- Fabulous rolled hems
**1300MDC**

**INSPIRING VERSATILITY**

**Rolled-hem lever**
Simply flick the rolled-hem lever to switch effortlessly to a rolled-hem stitch and back again, with no need to change the stitch plate or presser foot.

**Needle-threader**
The practical manual threading tool for quick threading.

**Swing-out upper-knife arm**
The upper-knife arm can be quick-released effortlessly at the press of a button to provide more room. This is particularly advantageous when, for example, you’re working in coverstitch mode, or do not wish to trim the fabric edge.

**Safety switch**
The safety switch is activated as soon as you open the looper cover or the fabric support plate, thus preventing the accidental operation of the overlocker during e.g. the threading process.

**Patented swing-out presser foot**
Simply swing the foot out to the side to give yourself plenty of space for easy threading and hassle-free needle change.

**LCD screen**
The clear display tells you both the personal and default basic settings of the stitch variants. You can also read the recommended basic thread tension here, as well as save personal settings.

**Micro Thread Control**
Thanks to the patented mtc thread control, the over-edge thread length can at last be set directly, giving you the perfect seam at the twist of a knob!

**Professional knife drive from above**
Provides the greatest, most robust cutting force. Even thick fabrics won’t deflect the upper knife – so all fabric edges can be trimmed safely and professionally.

**Differential feed**
Stepless differential feed ensures wave-free seams in knits, and prevents puckering in fine fabrics, whilst allowing deliberate gathering.

**Handwheel position indicator**
Easy, ergonomic operation: with the aid of the vision panel and the red position indicators, you’ll find the ideal threading position for the needles and the lower looper straightaway.

**Front foot lift system**
The front foot lift raises the front of the presser foot that bit higher, enabling accurate positioning of multiple layers of fabric and bulky projects such as hand-knitted jumpers beneath it.

**Accessories in the looper cover**
Here you’ll find the most commonly used accessories, neatly arranged and ready-to-hand.

**Threaded hemmer**
The threaded hemmer is an essential accessory for making rolled hems. Simply set the correct thread tension and the machine will automatically stitch the perfect rolled hem.

**Overlocker catalogue**
Inspiring versatility
The smaller of the two BERNINA M models, the BERNINA 1150MDA, makes creative sewing with the overlocker absolute child’s play. With this model, it’s simplicity itself to find the right seam for every application, and to optimise it with a flick of the wrist using mtc technology. Beautifully simple – simply beautiful.
**Specials**

---

**mtc Thread Control:**
For unrivalled ease in setting the over-edge thread length at the twist of a knob.

**Seam width 3 – 9 mm**
Lets you easily and durably sew together thin and smooth fabrics (e.g. silk) as well as loosely structured textiles (e.g. hand-knitted jumpers).

**Automatic needle-threader:**
Lets you thread both needles easily and without eyestrain.

**Thread lay-in system:**
The BERNINA lay-in system allows quick and direct threading every time. Thanks to the automatic lower-looper threading system, it’s also a cinch to thread the lower-looper.

**Handwheel position indicator:**
Easy, ergonomic operation: With the aid of the vision panel and the red position indicators, you’ll find the ideal needle and lower-looper threading position in no time flat.

---

Like the top-end ‘M’ model, this overlocker offers patented mtc technology for unrivalled ease of control of the over-edge thread length. Together with additional highlights such as the differential feed for wavefree seams and the swing-out presser foot for speedy threading, it makes sewing a delightfully easy and relaxed experience, rather than a chore. But it’s not just technical refinements that make this world-class overlockers. Its creative potential, fast sewing speeds and versatility are all things to be proud of. This machine is as well suited to the flawless sewing of garments and home textiles as it is to quilting. And the wide range of accessories that comes as standard (universal, blindstitch and elasticator presser feet, etc.) can be further expanded with high-quality optional accessories such as a cording foot, gatherer, and multi-purpose foot. And whether you want to sew thick or thin, fine or coarse materials, the 3-step pressure adjustment lets you instantly fine-tune your overlocker to suit your fabric.
1150MDA

Ease of use as standard

Patented swing-out presser foot
Simply swing the foot out to the side to give yourself plenty of space for easy threading and hassle-free needle change.

Auto-threader for two needles
Actively supports you by letting you thread both needles easily and ergonomically.

Front foot lift system
The front foot lift raises the front of the presser foot that bit higher, enabling accurate positioning of multiple layers of fabric and bulky projects such as hand-knitted jumpers beneath it.

Threaded system
The automatic lower-looper threading system lets you thread quickly and directly at all times. Thanks to the BERNINA lay-in system it is a breeze to insert the upper thread.

Micro Thread Control
Thanks to the patented mtc thread control, the over-edge thread length can at last be set directly, giving you the perfect seam at the twist of a knob!

Rolled-hem lever
Simply flick the rolled-hem lever to switch effortlessly to a rolled-hem stitch and back again, with no need to change the stitch plate or presser foot.

Differential feed
Stepless differential feed ensures wave-free seams in knits and prevents puckering in fine fabrics, whilst allowing deliberate gathering.

Safety switch
The safety switch is activated as soon as you open the looper cover or the fabric support plate, thus preventing the accidental operation of the overlocker during e.g. the threading process.

Handwheel position indicator
Easy, ergonomic operation: with the aid of the vision panel and the red position indicators, you’ll find the ideal threading position for the needles and the lower looper straightaway.

Accessories in the looper cover
Here you’ll find the most commonly used accessories, neatly arranged and ready-to-hand.

Elasticator foot
The elasticator foot guides and stretches the elastic as you insert it. Ideal for lingerie, bath- and sportswear, home textiles, etc.

Blindstitch foot
The blindstitch foot features an adjustable lateral guide plate which takes the hard work out of sewing blind hems. Suitable for blindhemming, flatlocking and heirloom techniques.

Overlocker catalogue
Compact and reliable

The BERNINA 800DL and 700D models give you easy, affordable access to the fascinating world of overlocking. Practical and versatile features make these machines an absolute breeze to use.
Specials

Up to 15 stitch variations:
Choose from 15 overlocking-stitch variations with 2-, 3- and 4-thread stitch patterns for all types of fabric.

Lay-in threading system:
The BERNINA lay-in system allows quick and direct threading every time. Thanks to the automatic lower-looper threading system, threading the lower looper is also a breeze.

Differential feed:
Smooth fabric feed lets you sew without puckering and pulling the material out of shape. Deliberate decorative gathering is also possible, of course.

Rolled-hem lever:
To switch from overlocking to rolled-hem stitch and back again, simply flick the switch – there’s no need to change either the stitch plate or presser foot.

Although a number of sewing machines offer overlock stitches, these could never take the place of a genuine overlocker. The compact, robust, easy-to-operate BERNINA 800DL and 700D are an ideal complement to your sewing machine, giving you delightfully easy access to the creative world of overlocking. Whether you’re working with the finest silk and satin, robust denim, thick fleece or stretch fabrics, the BERNINA entry-level overlockers will give you the sewing results you’ve always dreamed of – thanks especially to their ease of use, adjustable thread tension, and their 2-, 3- or 4-thread options. Perfect narrow and hard-wearing seams on stretch and woven fabrics, decorative rolled hems, gathering, sewing on elastic – all these tasks can now be done far more quickly, easily and skilfully.
Everything a beginner could want

Professional knife drive from above
Provides the greatest, most robust cutting force. Even thick fabrics won’t deflect the upper knife – so all fabric edges can be trimmed safely and professionally.

Rolled-hem lever
Simply flick the rolled-hem lever to switch easily to a rolled-hem stitch and back again, without needing to change the stitch plate or presser foot.

Lay-in threading system
The BERNINA lay-in system allows quick and direct threading every time. Thanks to the automatic lower-looper threading system, threading the lower looper is also a breeze.

Upper-looper cover
The upper-looper cover lets you overlock with just 2 threads, allowing you, for instance, to neaten individual layers of fabric or create decorative rolled hems with suitable fabrics whilst saving thread.

Adjustable thread tension
The practical slides show you the current thread tension and allow you to make stepless adjustments as needed.

Differential-feed and stitch-length controls
These ergonomic, easily accessible controls let you adjust fabric feed and stitch length to perfection with the flick of a wrist – even whilst sewing.

Differential feed
Stepless differential feed ensures wave-free seams in knits and prevents puckering in fine fabrics, whilst allowing deliberate gathering.

Note:
The product features described here refer to the 800DL. The 700D’s features are listed in the relevant table from page 22 onwards.
Specials

Professional 5-mm-wide coverstitch:
The tried-and-tested stitch for decorative seams.

Looper thread tension:
Thread tension is steplessly adjustable, making your work so much easier – especially with demanding fabrics.

Automatic chainstitch looper threader:
Press down the threader, thread loop, release the threader – threading could hardly be easier!

Thread cutter:
This practical tool makes it easy to cut the threads after you finish sewing, with no need to interrupt the flow of your work.

The ideal addition: cover & chain

Already have an overlocker or sewing machine, but want to be able to coverstitch and chainstitch as well? No problem. The BERNINA Funlock 009DCC is the ideal partner to give the crowning finish on textiles and garments you’ve sewn yourself!
Expand your creative scope! With the extensive range of functions and professional-looking stitches of the BERNINA Funlock 009DCC, you’re equipped for virtually all eventualities.

**Simple hem with coverstitch:** This 5 mm coverstitch is the precise width most often used in off-the-peg clothing, so it will truly have you sewing like a pro!

**Flat joining seam with coverstitch:** With pyjamas, joggers or summer dresses, nothing should rub against your skin. The coverstitch lets you sew perfectly flat joining seams for superb wearing comfort.

**Gathering with chainstitch:** Feel great in clothes that move and stretch with you: using elastic thread in the chain looper will produce highly elastic seams – ideally suited to sports- and children’s wear.

**Simple hem with chainstitch:** Lets you create fine hem finishes for trouser and jacket pockets, and for especially decorative textiles such as pillows or furniture covers.
Instant overlocking success

Whether you’re sewing soft furnishings for your home or a new outfit, this overlocker will ensure that your projects are a success. The bernette 610D boasts a range of impressive features making it easy to use, and an attractive price tag making it especially suitable for beginners. The swing-out free-arm front means that threading is a cinch. Stitch length, thread tension and differential feed are all easily adjustable. Colour-coded markings show you the way. The bernette 610D overlocker – instant success with your projects!

Built-in edge guide
The bernette 610D’s built-in fabric-edge guide lets you guide the fabric accurately to create extra-beautiful seams. The guide can be removed in a single step.

Easy seam-width adjustment
Quick and easy setting of the seam width using the separate dial on the left side of the machine.

Easy threading
The swing-out free-arm front of the bernette 610D provides easy access to the threading paths. Colour-coded marking makes threading even easier.
bernette 610D

2-, 3- and 4-thread seams
The bernette 610D provides all professional-standard seam types – from 2-thread flatlock stitch for joining and hemming stretch materials up to the 4-thread overlock stitch for neatening edges. No more frayed edges or puckered seams!

Extra long spool pins
The extra long spool pins can accommodate large 1000-m thread cones, enabling neat and reliable thread supply.

Differential feed
Stepless differential feed ensures pucker-free seams and allows deliberate gathering if required.

Waste collector
Simply fit the provided waste collector onto the looper cover to keep your work area neat and tidy.

Accessories in the looper cover
The bernette 610D comes with a wide range of accessories. The most frequently used ones are stored in the looper cover, so they are always to hand.

bernette

Length of edge-wrapping thread adjustable
Thanks to exchangeable overlock stitch fingers, the amount of edge-wrapping thread is adjustable. Slack threads are history.

Smooth sewing of heavy fabrics
The bernette 610D’s extra-powerful 120-watt motor can even cope with heavy fabrics such as denim without any difficulty.

Beautiful rolled hems
The bernette 610D allows for extra-fine adjustment of your rolled hems.

Special accessories
A comprehensive range of accessories is available for the 610D.

Overlocker catalogue}

Clearly laid-out control panel
Easy-to-use control panel. Colour-coded markings make adjusting thread tension a breeze.

Extra long spool pins
The extra long spool pins can accommodate large 1000-m thread cones, enabling neat and reliable thread supply.

Differential feed
Stepless differential feed ensures pucker-free seams and allows deliberate gathering if required.

Waste collector
Simply fit the provided waste collector onto the looper cover to keep your work area neat and tidy.

Accessories in the looper cover
The bernette 610D comes with a wide range of accessories. The most frequently used ones are stored in the looper cover, so they are always to hand.

Benartex, Brewer and oesd are wholly owned subsidiaries of BERNINA Holdings Ag. The well-known thread manufacturer Mettler is our partner.
A Tradition of Precision
Over 100 years of sewing experience

World-famous sewing-machine manufacturers BERNINA have been based on the shores of Lake Constance in Steckborn, Switzerland for over 100 years now. Our tradition-steeped business, now run by the fourth generation of the same family, develops and manufactures high-quality sewing and embroidery computers, as well as overlockers. BERNINA’s leading role has been achieved thanks to our passion for sewing, our quality without compromise in R&D and technology, and pioneering innovations that have written new chapters in sewing-machine history. Innovations such as Microsoft® Windows®-operated sewing and embroidery computers and BSR (BERNINA Stitch Regulator) – a world-first – are highlights consolidating our place at the cutting edge of technology. User-friendliness is of top priority in the development of new features and functions. At the same time, we aim to inspire our customers and support their creativity in various ways, including free professional training sessions on our machines. Beyond this, and to ensure the best possible local service, BERNINA cooperates closely with trusted dealerships in more than 60 countries.

Swiss products have always had a reputation for mechanical precision and superb workmanship – two of the hallmarks of both our overlockers and our sewing, embroidery and quilting computers. Today, unrivalled quality and cutting-edge technology put BERNINA sewing machines at the world forefront, making creative modern textile work easier than ever before.
