

BERNINA⁺

*Now there are even
more reasons to have
designs on a deco.*

Embroidering has never been so simple, quick and reliable as with the new BERNINA deco 330. The deco 330's intuitive operation via its sensor screen makes it an ideal embroidery machine for newcomers to the hobby. At the same time, its performance and features and its compatibility and extensibility through accessories won't fall short of advanced embroiderers' expectations. It only takes a few minutes to get to grips with operating the deco using its new, larger sensor screen and simple drag & drop function. The features on offer and the extensive range of designs, on the other hand, will provide you with years' worth of material to bring your embroidery ideas to life. So embroider yourself new challenges with the deco 330!

deco 330
BERNINA⁺

Deco-rated with a host of new features.

Unique BERNINA embroidery quality
Closer examination of the exclusive BERNINA designs reveals the fine, precise embroidery quality of the new deco 330.

Mirror and Rotate function
With the deco 330 you can mirror anything – even numbers or letters. It's just as simple to rotate designs in 45° steps, as well as scale them up or down.

Embroidery time display
Before you start embroidering, the total embroidery time for each design is displayed, as is the remaining embroidery time each time you change colour.

Automatic threading
The automatic threading feature makes threading the machine child's play. Small wonder that embroidery is now even more fun!

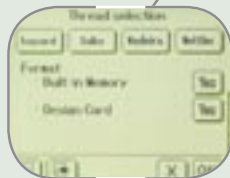

NEW: Flexibility with embroidery cards
The deco 330 lets you take advantage of the massive range of compatible BERNINA embroidery cards. The MagicBox™ gives you access to the majority of design cards by other manufacturers. In addition, The ATA Personal Design Card lets you download from your PC or save designs you've created yourself.

NEW: Freearm
The deco 330 boasts a freearm allowing even tubular textiles such as e.g. trouser legs or sleeves to be embroidered. With the freearm, we recommend using the optional hoop (C).

Upper-thread indicator and Lower-thread check
The upper-thread indicator and lower-thread check automatically stops the embroidery process as soon as the upper thread breaks or runs out. The bobbin filling is also checked before each embroidery process. This guarantees you interruption-free embroidering.

Colour scheme display and thread colours charts
The colour scheme display gives a colour recommendation for each embroidery sequence. Integrated colour palettes help you embroider a design with your own colours. One function even shows you the design without tying you to a specific thread manufacturer. This mode is ideal e.g. for using up thread remnants.

NEW: Scissors in special compartment
Cut out for practicality: The deco 330 comes with a pair of scissors stowed ready to hand in an integrated holder, right next to your main use area.

NEW: Drag & Drop
By touching and dragging the designs on the touchscreen, you can easily move and reposition them.

Special accessories:
The deco 330 has an extensive range of special accessories such as multiple spool holder, special hoops, Design PC Software and embroidery-card converter. Your stockist will be pleased to give you further details.
