

T-Shirt with writing

Method

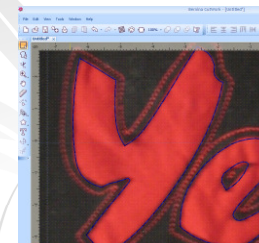

Step 1

Start the BERNINA CutWork Software and open your image as backdrop.

Step 2

Prepare the letters as a cutting line with an embroidered outline around the letters.

Step 3

Save your motif on a USB-stick or write it to your BERNINA embroidery machine.

Step 4

Hoop water soluble stabiliser and attach the T-Shirt with spray adhesive.

Step 5

Insert CutWork Tool and cut out the letters. The cutting line in a CutWork design is split up and indicated in 4 different colours. The colors refer to the 4 positions of the BERNINA CutWork Tool.

Step 6

Attach the backing fabric below the hoop with spray adhesive (do not unhoop T-Shirt).

Step 7

Insert embroidery needle and embroidery foot and thread your machine. Engage hoop and embroider the outline. Rinse out the embroidery stabiliser.

See the detailed instructions in the CutWork book that comes with your Software.
