

3D Diamond / bernette Embroidery

Requirements

bernette Embroidery Machine

3D Diamond Embroidery Design.

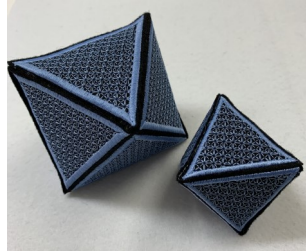

The design is a *free download* from the BERNINA website. This design will fit the large hoops of the bernette 70, 79 and the Chicago 7

Your choice of thread, use the same thread on the top & bottom of your machine

Tearaway

Acrylic Felt (firm)

Glue

- Hoop your tear away, cut the felt to fit within the inside your hoop, baste the felt onto the tear away by using the basting boxes on your machine, or spray baste the felt to the tear away.
- Stitch the design, un-hoop, cut out a scant to the right of the outlined shape including the green outline stitched flaps, being careful not to cut your stitching.
- Leave the tear away on, as the firmer the better for the final shape.
- Trim the back and front threads.
- Fold along the black felt between the stitched triangles, pressing is even better.
- Start with the top flap, glue it to the underside of the left triangle, as indicated in the image below. Wait for the glue to dry, continue around the shape until it is all glued together.
