

**BERNINA Firmware Release
B 560 - V34.36.60**Steckborn, 3rd of October 2014**Information on Firmware V34.36.60**

The firmware for the BERNINA 560 has been updated and optimized. In this release only the most relevant changes are listed.

1.) Embroidery – Thread tension menu

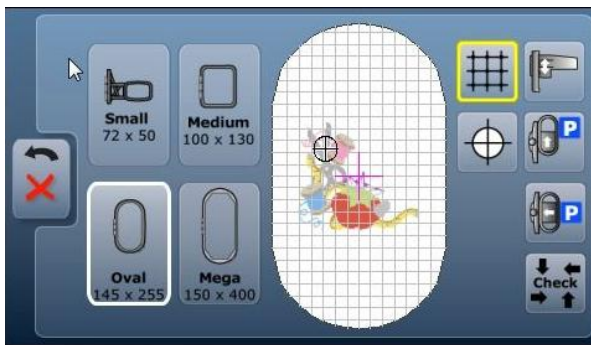

With the previous software, the thread tension menu was not displayed correctly and was not correctly driven. The new firmware corrects this issue.

The thread tension menu is now normally available and functional.

2.) Embroidery – Grid

Based on customer requests, we added the function "grid" in the embroidery.

Using these guiding lines, the customer can now optimally position and align the embroidery pattern.

**3.) Start-Stop button function**

Based on customer requests, we have adjusted the stitch speed by pressing the Start-Stop button, so that the speed is now increased slowly and not as before starts directly with final sewing speed. The customer can now easily place the fabric in the correct position by slower launch sewing speed.

Information concerning last Firmware V34.25.53 from 30.06.2014 in addition

The firmware for the BERNINA 560 has been updated and optimized. In this release only the most relevant changes are listed.

1.) Manual buttonholes with pointed bartack

The stitch quality when sewing manual buttonholes with pointed bartack has been optimized.

2.) Safety function when embroidering with double needle

When embroidering, the machine stops after selecting the incorrect double needle or stitch plate safety function. The corresponding animation appears in the display:

3.) Starting to embroider

After using the threader, cutting the thread automatically or rising the presser foot, the machine starts to tie on the thread automatically at the beginning of embroidery process.

4.) B 560 has 24 new stitch patterns

123		377		451		732	
133		425		452		743	
169		434		464		744	
372		436		641		745	
374		447		655		747	
375		450		728		930	

5.) Working in the BSR Mode 2:

Starting the machine with the foot control:

Stop moving the fabric; the machine keeps running at the programmed basic stitching speed as long as the foot control is pressed.

Starting via the Start/Stop button:

Stop moving the fabric: the machine keeps running at the programmed basic stitching speed for about 7 seconds and stops.

BERNINA International AG endeavors to keep improving and optimizing their products basing on customer feedback and the latest technical developments.

We do apologize for any resulting inconveniences.

Kind regards
