

# LEAF BOWL project

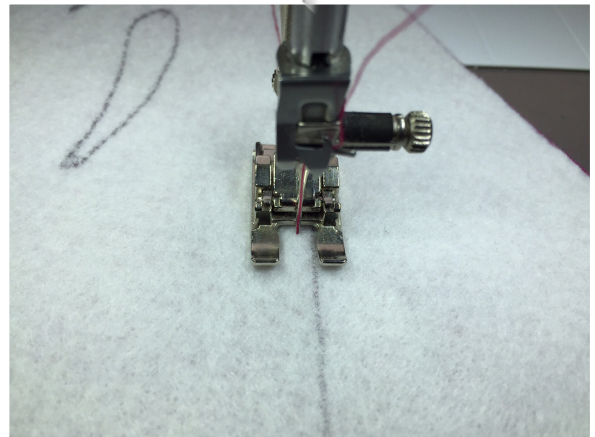

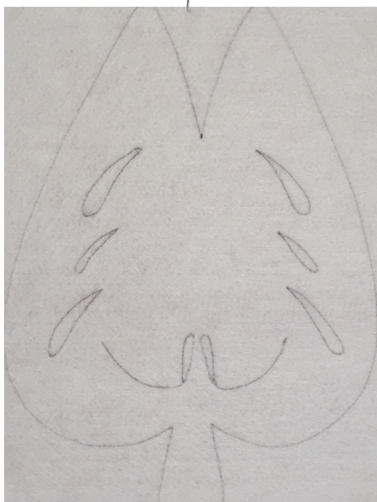

## Materials List

- 2 x Felt Squares 25cm x 35cm
- 1 x Vlisofix Square 25cm x 35cm
- Bernina Leaf Bowl Pattern
- Template Plastic
- Bernina Foot #20
- Thread

## Method

- Trace off the full leaf bowl pattern onto the template plastic. Cut around the outside and cut away the inserts
- Take the Vlisofix and iron it onto the wrong side of one felt square. Peel the paper off and lay the wrong side of the other felt square over the glue. Iron them together
- Trace the pattern onto one side of the joined felt squares.
- Attach Foot #20 to your Bernina machine and thread the machine with the same colour top and bottom. Using the inside edge of foot #20 as a guide, stitch around your marked lines. This stitching needs to be left after you cut out your bowl, so ensure it sits on the correct side of the line.

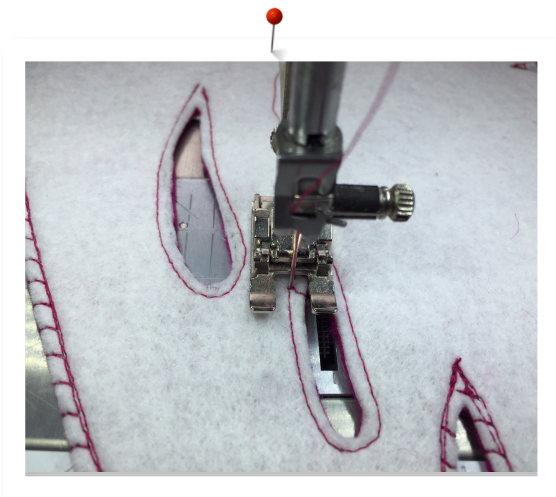

- Cut around the outside, leaving the stitching line. Cut away the inserts leaving the stitching line.

- Take the two top leaf points and overlap them at the point. Stitch into place.

- If you wish you can now embellish the bowl with additional stitching around the edges. Use foot #20 to ensure the stitching goes exactly where you want.

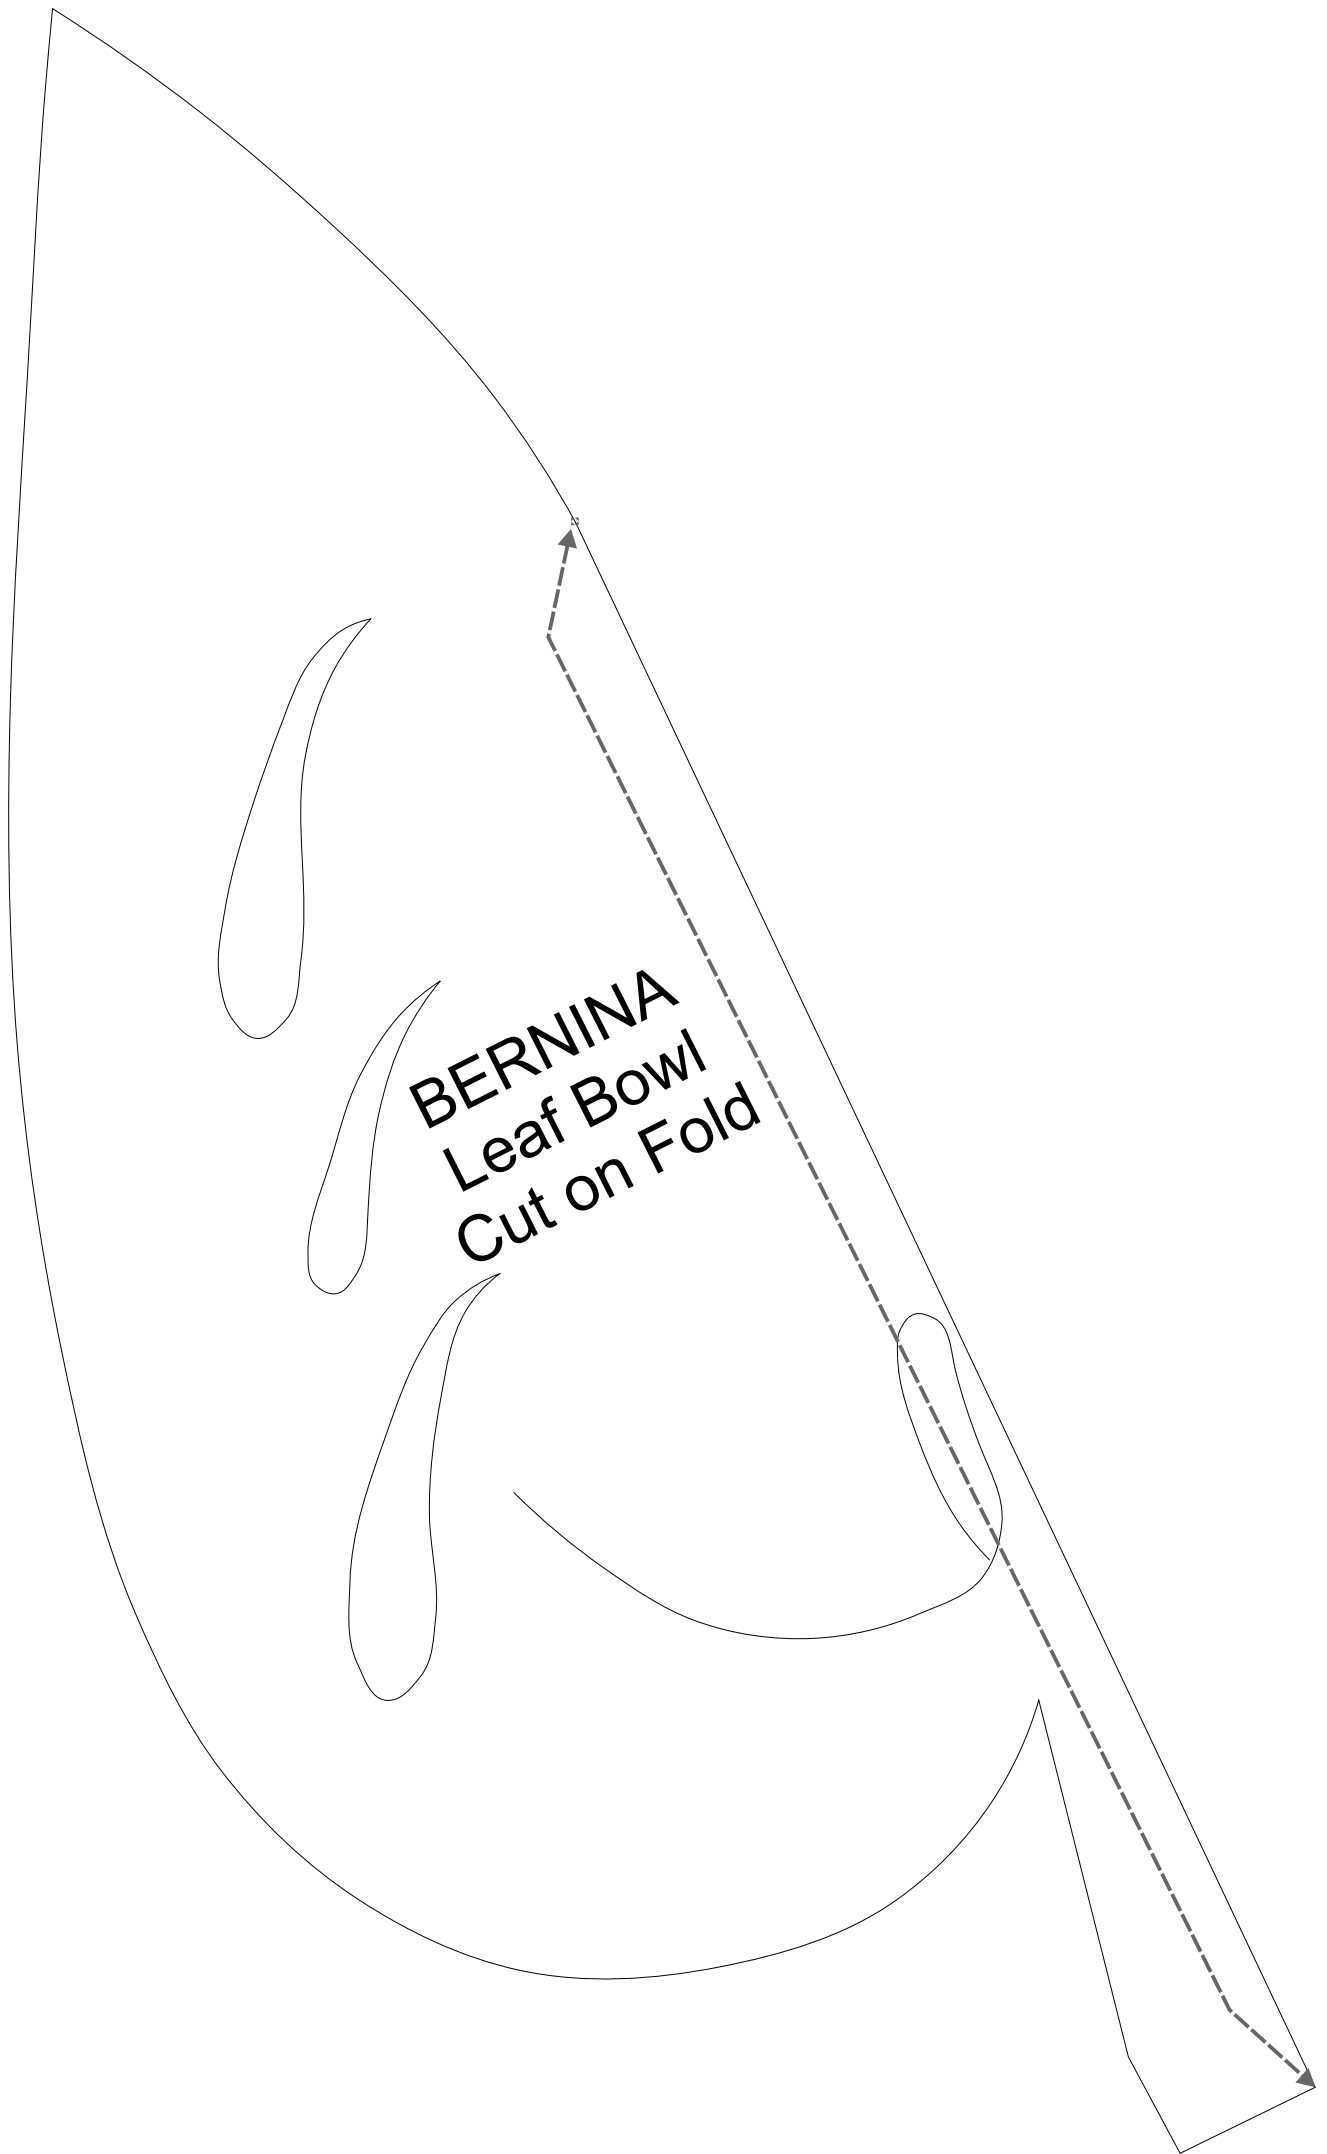

- Pull the two lower flaps to the back, under the stem. Overlap the curved point and stitch into place.

- You can use either side as the right side, the choice is yours!
