Embroidery Software 6

Logo Creation

Convert Vectors to Embroidery

Open a New File/Blank File

- Click on the New icon or select *File > New*.
- Select *Art Canvas mode*.
- Select *Load Picture*.
- Make sure *All File Formats* is chosen for the *Files of Type*.
- Navigate to the saved logo file included with this lesson, RC Printing Logo Color. ai. Select this file.
- Click on *Import*.
- Press *Enter* to center image on the page.
- Right click and drag the image away from the original and select *Copy Here*.
- While the image is selected, click on *Convert Vectors to Embroidery*.
- The image is processed and the mode switches automatically to *Embroidery Canvas*.
- Return to *Art Canvas*.
- Select the original image by clicking and drawing a bounding box around the group of letters to select all of the parts.
- Click on *Convert Text to Embroidery.*
- Select Edit> Select All.
- Open *Object Properties;* click on the *Effects* button at the bottom of the dialog box.
- Select the Others tab and change the Pull Compensation to .4 mm.
- Click OK.
- Navigate to desired location to save the file and name the file Converting Vector to Embroidery.
- Click on Save.

Notes:

Use the Vector Lettering icon to draw vector lettering in Art Canvas and then convert the lettering in one of two ways.

Using the Convert Text to Embroidery icon will convert the drawn text to a font and the font can be edited as lettering in Embroidery Canvas. This icon is only available in DesignerPlus software.

Using Convert Vectors to Embroidery will convert the drawn lettering to an object and is not recognized as lettering in Embroidery Canvas. This is the only option in EditorPlus.
